

Courses and instructors to develop your potential.

Live online or face to face.

Microsoft Azure Security Technologies (Az-500)

Describe specialized data classifications on Azure

Identify Azure data protection mechanisms

Implement Azure data encryption methods

Secure Internet protocols and how to implement them on Azure

Describe Azure security services and features

What will I learn?

LESSON 1

Module 1 Manage Identity and Access - Configure Azure AD PIM, Configure and manage Azure Key Vault, Configure Azure AD for Azure workloads, Security for an Azure subscription. After completing this module, students will be able to - Understand the Zero Trust Model, Configure Azure Active Directory for workloads, Configure Azure AD Privileged Identity Management, Configure Azure tenant security, Configure and manage Key Vault.

Key features

- ✓ Face to face or Live Online
- ✓ Fully certified trainer
- ✓ Get key skills and practical knowledge
- ✓ This course is available for groups and 1-2-1 live online
- ✓ Course materials included
- ✓ Recognised course certificate

LESSON 2

Module 2 Implement Platform Protection - Understand cloud security, Azure networking, Secure the network, Implementing host security, Implement platform security, Implement subscription security. After completing this module, students will be able to - Implement network security, Implement host security, Configure container Security, Implement Azure Resource Manager security.

LESSON 3

Module 3 Secure Data and applications - Configure security policies to manage data, Configure security for data infrastructure, Configure encryption for data at rest, Understand application security, Implement security for application lifecycle, Secure applications. After completing this module, students will be able to - Configure security policies to manage data, Configure security for data infrastructure, Configure encryption for data at rest, Implement security for application delivery, Configure application security.

LESSON 4

Module 4 Manage Security Operations - Configure security services, Configure security policies using Azure Security Center, Manage security alerts, Respond to an remediation of security issues, Create security baselines. After completing this module, students will be able to - Configure security services, Configure security policies, Manage security alerts.
